ABOUT THE EVENT

SPONSOR PRECISION AGRICULTURE 2019

After years of success in the USA, the organizer of InfoAG is partnering with New Ag International and coming to Europe to create the premier event for discussion and advancement for precision agriculture looking at field centric monitoring with imagery and sensors, seamless connectivity with IoT, data analytics and prediction modeling, variable rate technology, prescription platforms and digitalization. Sponsoring or Exhibiting will provide you access to 200+ attendees. Partner with a new B2B audience from the plant nutrition and biological crop care industries to develop solutions meeting their goals and objectives. Join us in Dublin to meet with the leaders of the Precision and digital Agriculture world.

Why Sponsor Precision Agriculture?

- Get online visibility, shake hands and network with the key stakeholders in the Ag input industry and identify new strategic business development opportunities
- Connect with world-renowned experts from other world regions who are leading the change in precision and digital agriculture

NEW AG & PRECISION AG: BRIDGING DATANOMICS WITH AGRONOMICS FOR PRODUCTIVE, SUSTAINABLE, AND PROFITABLE AGRICULTURE

New Ag International is recognized worldwide as the leading publisher and conference organiser in the field of High-Tech Agriculture. The sectors we cover are plant nutrition, biological crop care, irrigation-fertigation and greenhouse cropping.

Sensors, IoT, data analytics, prescription platforms and digitalization are changing the approaches to plant nutrition and protection as well as the management of irrigation and greenhouses. Our clients are developing and marketing products and services from those industries. They are engaged in building integrated solutions to differentiate and reinforce their value proposition.

Precision Ag and Digital Ag are spreading around the world and our readership in English, Spanish and Chinese to 150 countries will help disseminate the ins and outs of Precision Ag and help the market to grow as we have done for other emerging technologies such as Fertigation, Biopesticides and Biostimulants.

Through our high level and professional editorial, and with the strong support of all stakeholders, from the academic to the industry circles, we have pioneered the expansion of these emerging technologies. We will do the same with Precision Ag!

Field/crop sensing allows us to understand field variability and work out solutions that will unlock site and time specific soil limitations and/or address site specific crop stress. Your Precision Ag offerings will help customers, readers and conference attendees find solutions to their objectives.

STAY ACTIVE IN A CHANGING AG SPACE – PARTNER WITH NEW AG INTERNATIONAL

Advertise in our hard copy magazines and online flipbooks, or exhibit at our conferences, and expose yourself to a new B2B audience with which you develop partnerships or customize your services helping them to progress from a product/service offering to an integrated solution offering.
